

I prepare games where the children use their own bodies.....

Subtracting – 5 little ducks went swimming...

Or their
own
belonging
S

Experience has showed me that when I teach new mathematical concepts through play, and I let the children play for a big part of the math's lesson, I end up with a very happy group of children.

Not only – when they have to do their classwork, they finish it really quickly and correctly.

Introducing money

Buying fruits and adding the prices

Our small class shop

Tonina came to sell her fruits to the children

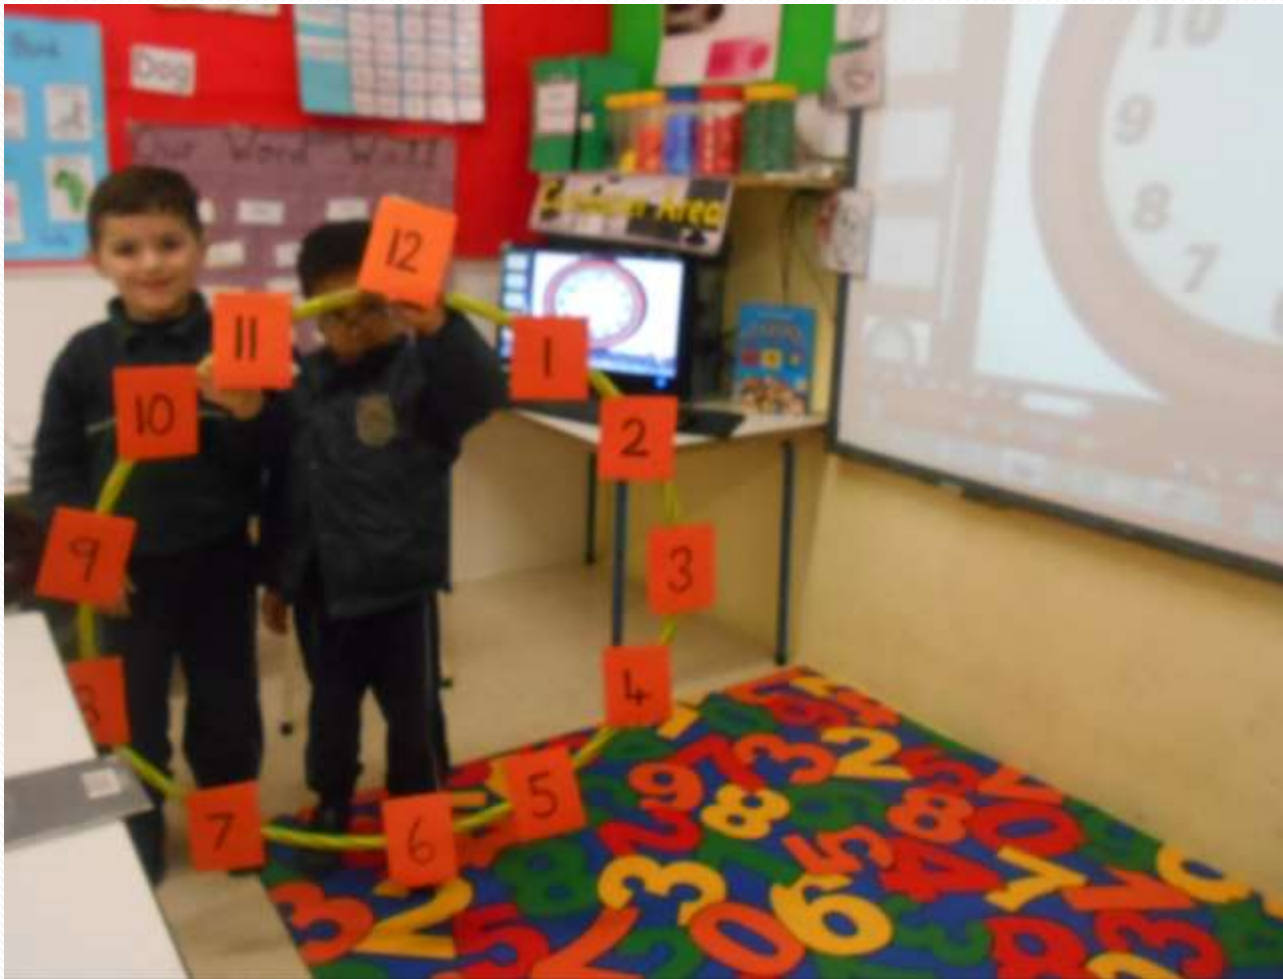

Time

Games on the IWB

Children play with their own individual clock, which they coloured in and prepared

Playing 'What's the time, Mr. Wolf?'

Some other Maths games

Ilio, our service dog plays Maths games with us, too!

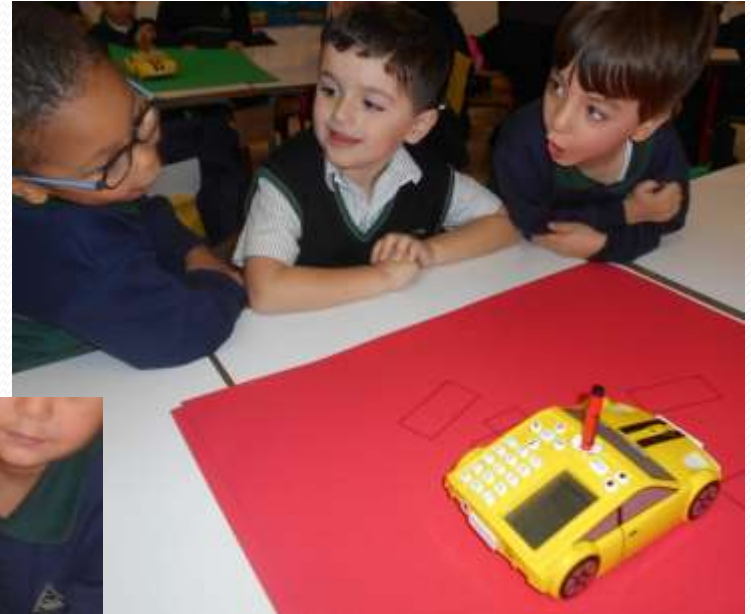

- Number Bonds using Numicon

Playing games in the school corridors

Playing with the probots

“Children learn
as they play. Most
importantly,
in play children
learn how to
learn.”

O. Fred Donaldson
